

Masatoshi Iji, NEC Corp.

Masatoshi Iji was born in Tokyo, Japan. He completed the master course of the department of environment chemistry and engineering of Tokyo Institute of Technology (1980) and received the master degree (1980) and the doctor degree (2002) from it. From 1980 to 1990, he joined Denki Kagaku Kogyo KK. (Japan) and developed plastics used in electronic components in the central research laboratories. In 1990, he joined NEC Corp. (Japan) and has been developing environmental conscious plastics including flame-retarding plastics with no use of toxic flame retardants and highly functional biomass-based plastics by using nano-composite technologies in the labs. He is now a research fellow of the labs. and also a senior manager of Eco-material research group in the labs. He is the author or co-author of more than 60 scientific and technical articles. He received eight awards in Japan and one award from IEEE.
